

Vnomic FREE Datacenter & SAP Transformation to Azure Assessment

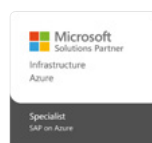

Accelerate Your SAP and
Datacenter **Transformation**
to **Microsoft Azure**

Overview

Modern enterprises are under pressure to modernize infrastructure, reduce operational costs, and improve resiliency while maintaining the performance and availability of mission-critical SAP workloads.

The Vnomic FREE Datacenter and SAP Assessment provides a structured and data-driven evaluation of your current datacenter and SAP environments. It delivers a fully architected target-state design on Microsoft Azure, including required Azure resources, projected costs, and a comprehensive financial business case.

This assessment enables organizations to make informed decisions about migration strategy, cost optimization, and long-term infrastructure modernization.

Gold Cloud Platform

What the FREE Assessment Includes

→ Current Environment Analysis

Vnomic performs a structured discovery of your existing infrastructure and SAP landscape, including:

- + Datacenter infrastructure inventory
- + SAP system landscape analysis
- + Database and storage configurations
- + Network and connectivity review
- + Backup and disaster recovery evaluation
- + Application and system dependency mapping
- + Performance and utilization analysis

→ Azure Target Architecture Design

Vnomic designs a future-state architecture aligned with Microsoft and SAP best practices.

This includes:

- + Azure landing zone architecture
- + Compute and storage sizing
- + Network architecture design
- + High availability and disaster recovery architecture
- + Security and governance alignment
- + Azure service recommendations

→ Azure Resource Identification

Detailed mapping of required Azure resources including:

- + Virtual machines
- + Storage tiers
- + Networking components
- + Backup and recovery services
- + Monitoring and security tools

→ Projected Azure Cost Modeling

The assessment includes a detailed cost model based on your real environment.

Projected cost components include:

- + Compute costs
- + Storage costs
- + Network costs
- + Licensing considerations
- + Backup and disaster recovery costs
- + Reserved instance and savings plan recommendations

→ Comprehensive Business Case

Vnomic consolidates all findings into a complete business case that includes:

- + Current datacenter operating costs
- + Projected Azure operating costs
- + Total Cost of Ownership (TCO)
- + Return on Investment (ROI)
- + Multi-year cost forecast
- + Optimization opportunities

This enables stakeholders to evaluate migration with financial confidence.

→ Proven Global Experience

Vnomic has supported large-scale SAP and datacenter transformation programs for global enterprises including:

- | | |
|-----------|---|
| + PepsiCo | + Mars |
| + Dow | + Newmont Mining |
| + Apache | + Coca-Cola Hellenic (CCH) |
| + DuPont | + Coca-Cola EuroPacific Partners (CCEP) |
| + Esri | |

Key Deliverables

Upon completion of the FREE Assessment, customers receive:

Technical Deliverables

- + Current Environment Assessment Report
- + SAP Landscape Analysis
- + Azure Target Architecture Design
- + High Availability Architecture
- + Disaster Recovery Architecture
- + Migration Readiness Plan

Financial Deliverables

- + Azure Resource Mapping
- + Projected Azure Cost Model
- + Cost Optimization Recommendations
- + Total Cost of Ownership (TCO)
- + Return on Investment (ROI) Business Case

Financial Benefits

- + Transparent cloud cost modeling
- + Optimization recommendations
- + Budget forecasting confidence
- + Reduced infrastructure overhead
- + Improved financial planning accuracy

Strategic Benefits

- + Cloud modernization readiness
- + SAP transformation acceleration
- + Enhanced scalability
- + Improved resilience
- + Foundation for AI and advanced analytics

Typical Assessment Timeline

Most FREE Assessments are completed within:

 **2-4 Weeks**

Typical phases include:

1. **Discovery Workshops**
2. **Environment Analysis**
3. **Architecture Design**
4. **Cost Modeling**
5. **Business Case Development**
6. **Executive Review**

WHY START WITH A FREE ASSESSMENT

The Vnomic FREE Datacenter and SAP Assessment removes uncertainty and establishes a clear foundation for successful transformation.

It enables organizations to:

- + **Understand their current environment**
- + **Evaluate Azure architecture options**
- + **Forecast long-term costs**
- + **Reduce migration risk**
- + **Build executive confidence**
